Start Time	End Time	Client	Project	
8:07 AM	9:15 AM	Super Plumber	Website	 
9:15 AM	9:30 AM	Super Plumber	Correspondence	 
9:30 AM	11:25 AM	My DeliveryMan	Website	 
11:25 AM	12:34 PM	Master Exterminator 34	Website	 

Change Project

Client Project [Enter Time](#) | [Manage Clients](#) | [Manage Projects](#) | [Hours Report](#) | [Billing Report](#)

Extras on this Page

1. Load the drop down lists on demand using AJAX.
2. Setup cascading on the drop down lists. That means you only load projects for the client that's selected.
3. Disable the start button when the timer is active and the stop button when one isn't.
4. Alternatively, if the user clicks start when a project

When you press the start button, it should automatically add a new row to the table with the current time as the start time, a blank end time, and the client and project you selected. When you press stop it should set the end time on the last row.

These two dropdown lists should be loaded from the database through MVC. For this project you can just load them with the view.

< SEPTEMBER 2019 >						
S	M	T	W	T	F	S
1	2	3	4	5	6	7
8	9	10	11	12	13	14
15	16	17	18	19	20	21
22	23	24	25	26	27	28
29	30					

[CANCEL](#) [OK](#)

You can use any style calendar you want for this page as long as it's easy to select the date.

Extras on this Page

1. Instead of choosing the date on a separate view, use an overlay with a date picker. This will require some javascript to create and display the overlay.
2. Use the Ajax MVC View helper to load the overlay from a Partial View instead of including it in the parent view.

Manage Projects

[Add Project](#)

#	Client	Project Name	Bill Rate	Active
1	Super Plumber	Website	\$80	Edit Details Delete
2	Super Plumber	Correspondence	\$50	Edit Details Delete
3	My DeliveryMan	Website	\$100	Edit Details Delete
4	My DeliveryMan	Business Process Consulting	\$150	Edit Details Delete

Use MVC RAD features to create standard CRUD editors for projects. Only display active projects in this list. Make sure to include an Is Active checkbox in the edit and details screens.

Hours Report

Start Date

/ /

End Date

/ /

Update

Total Hours

60 hours

Days Worked

21 days

[Enter Time](#) | [Manage Clients](#) | [Manage Projects](#) | [Hours Report](#) | [Billing Report](#)

Extras on this Page

1. Update the report using AJAX instead of doing a full page reload.
2. Show a table summarizing hours by day instead of a single total for the entire date range.

Billing Report

Start Date

End Date

Client	Project	Total Hours	Billing Rate	Total Due
Super Plumber	Website	45	\$80	\$3,600
Super Plumber	Correspondence	10	\$50	\$500

[Enter Time](#) | [Manage Clients](#) | [Manage Projects](#) | [Hours Report](#) | [Billing Report](#)

Extras on this Page

1. Update the report using AJAX.
2. Add together all the billing per client instead of breaking it up by project. Make sure to use the correct bill rate for each project before summarizing it!
3. Expand the billing / project system to mark some projects as non-billable. Include them in the hours report but *don't* include them in the billing report!
